Twin Creek Landmark

At our entrance we had a huge pine tree which was approximately 150' tall. It was damaged by wind in 2008 and we had to remove several large limbs. In January 2010 we had to remove the rest of limbs for safety reasons. Because the tree had so much stature at our entrance I had the tree topped by 32' and worked with a local chainsaw artist to make this huge pine into a work of art. After 5 weeks of chainsaw work in March of 2010 we have a true piece of art at our entrance. Each carving was cut out of the tree and still remains a part of the tree. There are 10 individual carvings in the tree and we are very pleased with the finished product. The local artist is Michael Copas here in Gatlinburg.
